- Make Tutor Stack open source
- Interested in reimplementing the application in Python as the language is the largest open source language. At the moment the application uses Typescript; which has a small market share.
- Make the application more accessible to non-IT lecturers. At the moment, the complex side of creating the modules is pushed onto individual lecturers.
- Tutor tools & Creating a how-to-use tutorial.
- Accessibility was brought up. Youtube has auto-captions and also immediately uploads the video when the stream is over. Colm is looking for a solution to easily divide up videos.
- The values were defined as being: simplifying the student experience, consistency.
